Strategic Collection Development and Planned Abandonment

- Strategic is defined as as “carefully designed or planned to serve a particular purpose or advantage.”
- Planned abandonment is “examining and possibly ending services that brought a library success in the past and, instead, continually reestablishing means of being relevant to our patrons and communities” (Evangeliste and Furlong, x)

Problems We Were Facing

- **We had had a change in leadership in June 2013.**
- **Budget Flat**
- **Encouraged to Change by University Administration**
- **Little Used, Out of Date Print Journal Collection**

Other Problems We Were Facing

- **Some Databases Were Not Being Used**
- **Desire to Make Room for Other Services and Resources in Our Library**
- **Desire to Be More Relevant to Patrons**
- **Increasing Journals and Databases Costs**

Past Approach

- In the past, we used reactive “solutions.”
 - We reacted to the situation rather than creating optimum, workable solutions.
 - We cancelled journals and databases due to cost rather than looking more strategically at what is the best solution for everyone.
 - With some resources, we continued to renew them without knowing whether they were still needed.
 - We did not have much contact with teaching faculty, so were not entirely aware of their needs.
 - We had rarely weeded our journal collection before 2010.

Turning of the Tides

- **We desire to be more relevant to our patrons by providing services and resources we do not currently have.**
- **We must carefully evaluate our subscriptions for their value and how well they fulfill current needs.**
- **How do current subscriptions impact other needs?**
 - **Other Needed Subscriptions**
 - **Need for Shelf Space**
 - **Other Needed Services**

Current Proactive Solution

- **Strategic Evaluation of All Existing and New Journals and Database Subscriptions**
 - **Content and Duplication in Other Resources**
 - **Usage Statistics**
 - **Cost of Subscriptions**
 - **Cost Per Use**
 - **Indexing of Journals**
 - **Curriculum Changes**
 - **Format**
 - **Liaisons Talk With Teaching Faculty**
 - **Interlibrary Loan Requests**

Results & Conclusions

- **Developing a strategic collection development focus has helped us to improve the content and usefulness of our resources and collections.**
- **Weeding Out of Date, Irrelevant Journals to make Room for Needed Materials**
- **It has also helped us to better utilize our resources overall.**
- **Cancelled Journal and Database Subscriptions that are Not Relevant to Have a Collection Focused on Curriculum and Research Needs**
- **Increased Engagement of Faculty With Librarians**
- **More Faculty Send Students to the Library to Use library resources**
- **Increased Usage of the Some of the Library's Electronic Resources**

Future Plans & Thoughts

- We plan to continue talking to faculty and students, examining content of resources, usage statistics, and finding out what is needed.
- We plan to continue to do judicious weeding of out of date and irrelevant journals.
- We hope that by using strategic collection development, we will create a wave of positive opinion on campus and continue to be relevant.
